

ABSTRACTS

A rounded top headstone shaped loose-leaf ring binder, with the ring assembly attached to the right edge of the inside back cover. A transparent horizontally loading folded sheet protector, with a 1/2" ring retaining extension on the right edge of the back panel, was designed to mount onto the rings of this binder. The sheet protector will enable the viewer to view the front, inside and back of a folded 8 1/2"X11" paper document folded in half.
